

Chemical Process & Industrial Pumps

Horizontal volute casing pumps according according to EN 733 and ISO 5199 / EN 25199.

Technical Data

Flow rate: up to 3,500 m³/h

Head: up to 160 m

Product Series Chemical Process: CBS / CBT / DBS / DBV

Product Series Industrial: ZLN / ZLK / SPL / ULN / ZLI

Design

Chemical process & Industrial pumps are used in a wide variety of applications and due to their high reliability they provide reduced operating costs in the Process industry. Specific technical standards including ISO 5199 / EN 25199 and ISO 2858 / EN 22858 are fully complied with, providing a modular range of efficient chemical process and Industrial pumps.

More Information

- Request for Information / Quotation

Application Industrial

Application areas for pumps in this range include automobile, mechanical and general engineering industries, food and beverage industry, pharmaceutical industry, paint industry, plastic and rubber industry, iron and non-ferrous metal industry, paper and pulp industry, textile industry, building and construction industry, heating and air conditioning, drainage, water supply and irrigation.

Application Chemical

SIHI chemical process pumps meet the requirements on custom-built solutions in the process industry, in the following areas: chemical and pharmaceutical, petrochemical, paper, plastics, food processing, plant engineering and construction.
