

SIHI Pumps for Palm Oil Mills & Refineries

Extensive application knowledge as well as a broad range of SIHI products provides an optimized solution for processes within the Palm Oil Mills and Refineries…

SIHI Pumps Asia has major experience in palm oil mills and refineries and has an extended list of installations and references throughout Malaysia, Indonesia, Thailand, Vietnam and other countries world wide.

- Broad range of products
- Reliable pumping solutions
- Major references / installations
- Delivery from stock
- Extensive service network
- Reduced life-cycle costs
- Seminar and training on site

A broad range of pumps and materials as well as a complete service solution ensure optimized processes.

Application
Pump Type
Pump Execution

- Palm Oil Mill
- Palm Oil Refinery

End Suction

Type: ZLN, CBS

Flow rate: 4800 m³/h

Head: 240 m

- Palm Oil Mill
- Palm Oil Refinery

Side Channel

Type: CEH

Flow rate: 35 m³/h

Head: 325 m

- Palm Oil Mill

- Palm Oil Refinery

Multistage

Type: MSL/MSM, HEG

Flow rate: 650 m³/h

Head: 1600 m

- Palm Oil Mill

- Palm Oil Refinery

Vacuum Pumps

Type: LPHX / LEM

Suction capacity: $\leq 20,400$ m³/h

Operating pressure: ≥ 33 mbar

- Palm Oil Refinery

Sealless Pumps

Type: CBE/CBM

Flow rate: 35 m³/h

Head: 150 m

- Palm Oil Mill

Non-Clogging

Type: DBS

Flow rate: 1200 m³/h

Head: 100 m
